Hi notactually-me,

Thanks for writing in!

We aren't able to restore a branch on our end, but you actually are. You can use the link below to view your repository at the last commit before the branch was deleted.

Here is the log showing last commit – `1d5331db64d0a9fe4656ecc0fc816a3e265657bc` – before the force push on 022-06-20T12:53:06.000-07:00:

```
{
  "time": "2022-06-20T12:53:06.000-07:00",
  "user_login": "notactually-me",
  "targets": [
    {
      "ref": "refs/heads/main",
      "before": "1d5331db64d0a9fe4656ecc0fc816a3e265657bc",
      "after": "2eaaf0862df2f98252f581e84df642bb9b453d0b"
    }
  ],
  "force_push": true
}
```

You can then use the tree drop-down menu (the branch selector) to create a new branch from that history.

https://github.com/notactually-me/learning-web-technologies-summer2021-2022-sec-h/tree/
1d5331db64d0a9fe4656ecc0fc816a3e265657bc

We have a help article that explains how to do this:

https://docs.github.com/en/github/collaborating-with-issues-and-pull-requests/creating-and-deleting-branches-within-your-repository#creating-a-branch

Feel free to reach out if you have any additional questions about this!

Regards,
Peter
